<b>1</b>	<b>Introduction and Summary</b> . . . . .	<b>1</b>
	Hans von Storch, Anders Omstedt, Janet Pawlak, and Marcus Reckermann	
1.1	Overview . . . . .	1
1.1.1	Background . . . . .	1
1.1.2	Overall Summary . . . . .	2
1.1.3	The BACC Process . . . . .	3
1.1.4	Important Terminology . . . . .	3
1.1.5	Annexes. . . . .	3
1.2	Executive Summary . . . . .	4
1.2.1	Long-term Climate Change: From the Holocene to the Little Ice Age . . . . .	4
1.2.2	Recent Climate Change: The Past 200 Years . . . . .	4
1.2.3	Future Climate Change . . . . .	11
1.2.4	Environmental Impacts of Climate Change . . . . .	16
1.2.5	Socio-Economic Impacts of Climate Change. . . . .	19
1.2.6	Drivers of Regional Climate Change: Detecting Anthropogenic Change and Attributing Plausible Causes . . . . .	20
	References. . . . .	22

## Part I Long-term Climate Change

<b>2</b>	<b>Climate Change During the Holocene (Past 12,000 Years)</b> . . . . .	<b>25</b>
	Irena Borzenkova, Eduardo Zorita, Olga Borisova, Laimdota Kalniņa, Dalia Kisielienė, Tiiu Koff, Denis Kuznetsov, Geoffrey Lemdahl, Tatyana Sapelko, Migle Stančikaitė, and Dimitry Subetto	
2.1	Introduction . . . . .	25
2.2	Causes of Climate Variability During the Holocene. . . . .	26
2.2.1	External Climate Forcing . . . . .	26
2.2.2	Climate Modelling of the Holocene in the Baltic Sea Basin. . . . .	28
2.3	Palaeoclimatic Reconstructions Over the Holocene . . . . .	29
2.3.1	Sources of Palaeoclimatic Data . . . . .	29
2.3.2	Methodology for Palaeoclimatic Reconstructions. . . . .	29
2.4	Climate Variability During the Holocene Relevant for the Baltic Sea Basin. . . . .	32
2.4.1	Climate at the Boundary of the Younger Dryas/Holocene. . . . .	33
2.4.2	Early Holocene Oscillations . . . . .	34
2.4.3	The ‘8.2 ka Cold Event’. . . . .	37
2.4.4	The Holocene Thermal Maximum . . . . .	39

2.4.5	Late Holocene Cooling . . . . .	42
2.5	Conclusion. . . . .	43
	References. . . . .	44
<b>3</b>	<b>The Historical Time Frame (Past 1000 Years)</b> . . . . .	<b>51</b>
	Tadeusz Niedźwiedź, Rüdiger Glaser, Daniel Hansson, Samuli Helama, Vladimir Klimenko, Ewa Łupikasza, Łukasz Małarzewski, Øyvind Nordli, Rajmund Przybylak, Dirk Riemann, and Olga Solomina	
3.1	Introduction . . . . .	51
3.2	Data Sources and Methodology . . . . .	52
3.3	General Features of the Millennial Climate. . . . .	53
3.4	The Medieval Warm Period (MWP 900–1350). . . . .	56
3.5	The Transitional Period (TP 1350–1550) . . . . .	57
3.6	The Little Ice Age (LIA 1550–1850). . . . .	58
3.7	Conclusion. . . . .	61
	References. . . . .	62
<b>Part II Recent Climate Change (Past 200 Years)</b>		
<b>4</b>	<b>Recent Change—Atmosphere</b> . . . . .	<b>69</b>
	Anna Rutgersson, Jaak Jaagus, Frederik Schenk, Martin Stendel, Lars Bärring, Agrita Briede, Björn Claremar, Inger Hanssen-Bauer, Jari Holopainen, Anders Moberg, Øyvind Nordli, Egidijus Rimkus, and Joanna Wibig	
4.1	Introduction . . . . .	70
4.2	Large-Scale Circulation Patterns . . . . .	70
4.2.1	Circulation Changes in Recent Decades . . . . .	71
4.2.2	Long-Term Circulation Changes . . . . .	73
4.2.3	NAO and Blocking . . . . .	74
4.2.4	Distant Controls of Circulation Changes. . . . .	75
4.2.5	Controls of the NAO . . . . .	76
4.2.6	Circulation Changes in Contrast to Global Warming . . . . .	77
4.3	Surface Pressure and Winds . . . . .	77
4.3.1	Wind Climate in Recent Decades . . . . .	77
4.3.2	Long-Term Wind Climate . . . . .	79
4.3.3	Long-Term Trends Versus Decadal Variability . . . . .	81
4.3.4	Potential Inconsistencies in Long-Term Trends . . . . .	82
4.4	Surface Air Temperature . . . . .	83
4.4.1	Long-term Temperature Climate . . . . .	83
4.4.2	Temperature Trends in Recent Decades . . . . .	85
4.4.3	Daily Cycle and Seasonality . . . . .	86
4.4.4	Temperature Extremes . . . . .	86
4.5	Precipitation. . . . .	87
4.5.1	Long-Term Precipitation Climate. . . . .	87
4.5.2	Precipitation Climate in Recent Decades . . . . .	88
4.5.3	Precipitation Extremes . . . . .	88
4.6	Cloudiness and Solar Radiation. . . . .	91
4.6.1	Cloudiness . . . . .	91
4.6.2	Sunshine Duration and Solar Radiation . . . . .	91
4.7	Conclusion. . . . .	92
	References. . . . .	92

<b>5</b>	<b>Recent Change—River Run-off and Ice Cover</b> . . . . .	99
	Jukka Käyhkö, Elga Apsite, Anna Bolek, Nikolai Filatov, Sergey Kondratyev, Johanna Korhonen, Jurate Kriaučiūnienė, Göran Lindström, Larisa Nazarova, Anna Pyrh, and Marzenna Sztobryn	
5.1	Introduction . . . . .	99
5.1.1	General Drainage Characteristics of the Baltic Sea Basin . . . . .	101
5.2	Basin-scale Change in Run-off Patterns . . . . .	102
5.3	Regional and Seasonal Variations . . . . .	104
5.3.1	Sub-basin-scale Changes . . . . .	104
5.3.2	Regional Discharge Patterns by Country. . . . .	106
5.4	River Ice Regime . . . . .	113
5.5	Conclusion. . . . .	115
	References. . . . .	115
<b>6</b>	<b>Recent Change—Terrestrial Cryosphere</b> . . . . .	117
	Sirpa Rasmus, Jan Boelhouwers, Agrita Briede, Ian A. Brown, Malgorzata Falarz, Susanne Ingvander, Jaak Jaagus, Lev Kitaev, Andrew Mercer, and Egidijus Rimkus	
6.1	Introduction . . . . .	117
6.2	Recent and Present Change in Seasonal Snow Cover. . . . .	119
6.2.1	Snow Cover Formation, Duration and Melt . . . . .	119
6.2.2	Snow Depth and Snow Water Equivalent . . . . .	121
6.2.3	Snow Cover Extent . . . . .	122
6.2.4	Snow Structure and Properties . . . . .	122
6.2.5	Extreme Events. . . . .	123
6.3	Recent and Present Change in Glacier Extent and Mass Balance. . . . .	124
6.4	Recent and Present Change in Frozen Ground . . . . .	125
6.4.1	Seasonally Frozen Ground . . . . .	125
6.4.2	Permafrost . . . . .	125
6.5	Conclusion. . . . .	126
	References. . . . .	127
<b>7</b>	<b>Recent Change—Marine Circulation and Stratification.</b> . . . .	131
	Jüri Elken, Andreas Lehmann, and Kai Myrberg	
7.1	Introduction . . . . .	131
7.2	Trends and Variations in Water Temperature . . . . .	132
7.3	Changes in Salinity, Stratification and Water Exchange . . . . .	134
7.4	Circulation and Transport Patterns and Processes . . . . .	136
7.4.1	Surface Circulation and Related Processes—Recent Findings. . . . .	137
7.4.2	Dynamics in the Bottom Layer . . . . .	139
7.4.3	Mixing. . . . .	139
7.5	Sensitivity to Changes in Forcing . . . . .	140
7.6	Conclusion. . . . .	142
	References. . . . .	143
<b>8</b>	<b>Recent Change—Sea Ice</b> . . . . .	145
	Jari J. Haapala, Iina Ronkainen, Natalija Schmelzer, and Marzenna Sztobryn	
8.1	Introduction . . . . .	145
8.2	Ice Extent . . . . .	146
8.3	Ice Duration. . . . .	150

8.4	Ice Thickness . . . . .	150
8.5	Conclusion. . . . .	152
	References. . . . .	152
<b>9</b>	<b>Recent Change—Sea Level and Wind Waves. . . . .</b>	<b>155</b>
	Birgit Hünicke, Eduardo Zorita, Tarmo Soomere, Kristine S. Madsen, Milla Johansson, and Ülo Suursaar	
9.1	Introduction . . . . .	155
9.2	Sea Level Observations . . . . .	156
	9.2.1 Tide Gauges . . . . .	156
	9.2.2 Satellite Altimetry and GPS Measurements. . . . .	158
9.3	Change in Mean Sea Level . . . . .	160
	9.3.1 Main Factors Driving Sea Level Change . . . . .	160
	9.3.2 Variations Within the Observational Period (Past 200 Years) . . . . .	163
9.4	Extreme Sea Levels. . . . .	169
	9.4.1 Main Factors Affecting Extreme Sea Levels in the Baltic Sea . . . . .	170
	9.4.2 Statistics and Long-Term Trends in Extreme Sea Levels . . . .	172
9.5	Wind Waves . . . . .	173
	9.5.1 Instrumental Measurements. . . . .	173
	9.5.2 Visual Observations. . . . .	174
	9.5.3 Hindcast Simulations . . . . .	176
9.6	Conclusion. . . . .	180
	References. . . . .	180
 <b>Part III Future Climate Change</b>		
<b>10</b>	<b>Projected Change—Models and Methodology . . . . .</b>	<b>189</b>
	Joanna Wibig, Douglas Maraun, Rasmus Benestad, Erik Kjellström, Philip Lorenz, and Ole Bøssing Christensen	
10.1	Introduction . . . . .	189
10.2	Dynamical Downscaling . . . . .	191
	10.2.1 Methodology for Dynamical Downscaling . . . . .	191
	10.2.2 Performance of RCMs in Reproducing Recent Climate . . . . .	191
	10.2.3 Developing and Extending RCMs . . . . .	193
10.3	Statistical Downscaling . . . . .	195
	10.3.1 Model Output Statistics . . . . .	195
	10.3.2 The ‘Perfect Prognosis’ Approach . . . . .	196
10.4	Ensembles, How to Use Them and How to Assess an Error of Projection . . . . .	198
	10.4.1 Different Types of Ensembles . . . . .	198
	10.4.2 Are Ensemble Projections Better Than Those Based on Single Climate Projections? . . . . .	199
	10.4.3 Performance-Based Weighting of Ensembles. . . . .	199
	10.4.4 Design and Use of GCM-RCM Ensemble Regional Climate Projections . . . . .	200
10.5	Validation Techniques . . . . .	200
	10.5.1 Validation Data. . . . .	200
	10.5.2 Validation Indices . . . . .	201
	10.5.3 Validation Measures . . . . .	202
	10.5.4 Measures for Distribution-Wise Validation . . . . .	202

10.5.5	Measures for Eventwise Validation . . . . .	202
10.5.6	Validation in a Climate Change Context. . . . .	203
10.6	Skill of Downscaling Methods . . . . .	203
10.7	Added Value of Dynamical Downscaling. . . . .	207
10.8	Downscaling in the Context of Climate Change Impact Studies . . . . .	210
10.9	Conclusion. . . . .	210
	References. . . . .	211
<b>11</b>	<b>Projected Change—Atmosphere . . . . .</b>	<b>217</b>
	Ole Bøssing Christensen, Erik Kjellström, and Eduardo Zorita	
11.1	Introduction . . . . .	217
11.2	Emission Scenarios . . . . .	218
11.3	Global Climate Models . . . . .	218
11.4	Regional Climate Models. . . . .	219
11.5	Temperature. . . . .	219
11.6	Precipitation. . . . .	222
11.7	Wind. . . . .	225
11.8	Snow. . . . .	227
11.9	Statistical Downscaling . . . . .	228
11.10	Conclusion. . . . .	232
	References. . . . .	232
<b>12</b>	<b>Projected Change—Hydrology . . . . .</b>	<b>235</b>
	Torben Obel Sonnenborg	
12.1	Introduction . . . . .	235
12.2	Country-Specific Projections. . . . .	235
12.2.1	Belarus . . . . .	235
12.2.2	Denmark . . . . .	235
12.2.3	Estonia . . . . .	236
12.2.4	Finland . . . . .	236
12.2.5	Germany . . . . .	238
12.2.6	Latvia . . . . .	238
12.2.7	Lithuania . . . . .	238
12.2.8	Norway . . . . .	238
12.2.9	Poland. . . . .	239
12.2.10	Russia . . . . .	239
12.2.11	Sweden . . . . .	239
12.3	Conclusion. . . . .	240
	References. . . . .	241
<b>13</b>	<b>Projected Change—Marine Physics . . . . .</b>	<b>243</b>
	H.E. Markus Meier	
13.1	Introduction . . . . .	243
13.2	Water Temperature . . . . .	244
13.3	Salinity . . . . .	245
13.4	Sea Ice . . . . .	248
13.5	Storm Surges . . . . .	249
13.6	Wind Waves . . . . .	250
13.7	Conclusion. . . . .	250
	References. . . . .	251

<b>14 Projected Change—Sea Level</b> . . . . .	253
Aslak Grinsted	
14.1 Introduction . . . . .	253
14.2 Sea-level Budget. . . . .	254
14.3 Steric Expansion. . . . .	255
14.4 Geoid Changes. . . . .	256
14.5 Mountain Glaciers and Ice Caps . . . . .	257
14.6 Greenland Ice Sheet . . . . .	257
14.7 Antarctic Ice Sheet . . . . .	258
14.8 Glacial Isostatic Adjustment . . . . .	258
14.9 The Compiled Budget . . . . .	259
14.10 Conclusion. . . . .	261
References. . . . .	261
<b>Part IV Environmental Impacts of Climate Change</b>	
<b>15 Environmental Impacts—Atmospheric Chemistry</b> . . . . .	267
David Simpson, Jerzy Bartnicki, Jukka-Pekka Jalkanen, Hans-Christen Hansson, Ole Hertel, Joakim Langner, and Sara C. Pryor	
15.1 Introduction . . . . .	267
15.2 Emissions . . . . .	268
15.2.1 Land-Based Sources . . . . .	268
15.2.2 Shipping . . . . .	270
15.2.3 Land and Sea Emissions—Impact of Climate Change . . . . .	273
15.3 Observed Concentrations and Deposition . . . . .	274
15.3.1 Sulphur and Nitrogen. . . . .	274
15.3.2 Ozone . . . . .	275
15.4 Modelled Concentrations and Deposition . . . . .	276
15.4.1 ‘Climate’ Meteorology, Impacts of Climate Change. . . . .	278
15.5 Uncertainty of Estimates . . . . .	281
15.5.1 Wet Deposition. . . . .	281
15.5.2 Dry Deposition . . . . .	283
15.6 Human Health Effects of Air Pollution . . . . .	284
15.7 Conclusion. . . . .	285
References. . . . .	285
<b>16 Environmental Impacts—Coastal Ecosystems, Birds and Forests</b> . . . . .	291
Pekka Niemelä, Harri Tolvanen, Mia Rönkä, Seppo Kellomäki, Joachim Krug, Guy Schurgers, Esa Lehtikoinen, and Risto Kalliola	
16.1 Introduction . . . . .	291
16.2 The Coastal Zone and Shorelines . . . . .	292
16.2.1 Heterogeneity Implies Regionally Different Effects . . . . .	292
16.2.2 Impacts of Climate Change on Coastal Areas . . . . .	294
16.2.3 The SW-Finnish Archipelago as an Example of a Particularly Sensitive Coastal Environment . . . . .	295
16.3 Climate Change Effects on Coastal Birds and Seabirds . . . . .	296
16.3.1 Coastal Birds and Seabirds as Components of Baltic Sea Ecosystems . . . . .	296
16.3.2 Climate Change Effects . . . . .	297
16.4 Climate Change Effects on Forests and Natural Vegetation . . . . .	300
16.4.1 Effects on Forest Growth . . . . .	300

16.4.2	Effects on Natural Vegetation . . . . .	301
16.4.3	Effects on Carbon Storage . . . . .	301
16.5	Conclusion. . . . .	301
	References. . . . .	302
<b>17</b>	<b>Environmental Impacts—Freshwater Biogeochemistry . . . . .</b>	<b>307</b>
	Christoph Humborg, Hans Estrup Andersen, Thorsten Blenckner, Mathias Gadegast, Reiner Giesler, Jens Hartmann, Gustaf Hugelius, Jens Hürdler, Pirkko Kortelainen, Gitte Blicher Mathiesen, Markus Venohr, and Gesa Weyhenmeyer	
17.1	Introduction . . . . .	307
17.2	Overview of Freshwater Biogeochemistry and the Baltic Sea Catchment . . . . .	307
17.2.1	The Baltic Sea Catchment . . . . .	307
17.2.2	Changes Shaping the Baltic Sea . . . . .	308
17.2.3	Drivers of Change in Sources, Transformation and Export of Biogenic Elements to the Baltic Sea . . . . .	310
17.3	Atmospheric Deposition and Freshwater Biogeochemistry . . . . .	311
17.3.1	Atmospheric Deposition and Waterborne Fluxes . . . . .	311
17.3.2	Transformations of Nutrients Along the Aquatic Continuum . . . . .	313
17.3.3	Climate Impacts on Atmospheric Deposition and the Effect on Waterborne Fluxes . . . . .	313
17.3.4	Current and Future Export to the Baltic Sea . . . . .	313
17.4	Forestry, Wetland Management and Freshwater Biogeochemistry . . . . .	314
17.4.1	Forest, Wetlands and Waterborne Fluxes . . . . .	314
17.4.2	Influence of Management Practices . . . . .	315
17.4.3	Transformations of Carbon Along the Aquatic Continuum . . . . .	316
17.4.4	Climate Impacts on Waterborne Losses from Forests and Wetlands . . . . .	317
17.4.5	Current and Future Export to the Baltic Sea . . . . .	318
17.5	Eutrophication and Freshwater Biogeochemistry . . . . .	319
17.5.1	Agriculture, Urban Areas and Waterborne Fluxes . . . . .	319
17.5.2	Transformations of Nutrients Along the Aquatic Continuum . . . . .	323
17.5.3	Climate Impacts on Waterborne Losses from Agriculture and Urban Areas . . . . .	324
17.5.4	Current and Future Export to the Baltic Sea . . . . .	325
17.6	Hydrological Alterations and Freshwater Biogeochemistry . . . . .	326
17.6.1	Hydrological Alterations and Waterborne Fluxes . . . . .	326
17.6.2	Climate Impacts on Regulated Rivers and the Effect on Waterborne Fluxes . . . . .	327
17.6.3	Current and Future Export from Regulated Rivers . . . . .	328
17.7	Conclusion. . . . .	328

## Part VI Drivers of Regional Climate Change

<b>23</b>	<b>Regional Evidence of Global Warming</b> . . . . .	427
	Jonas Bhend	
23.1	Introduction . . . . .	427
23.2	Causes of Change in Temperature . . . . .	428
23.2.1	Mean Near-Surface Temperature . . . . .	428
23.2.2	Temperature Extremes . . . . .	429
23.2.3	Potential Influence of Circulation Changes on the Detectability of Warming . . . . .	430
23.3	Causes of Change in Circulation and the Hydrological Cycle . . . . .	430
23.3.1	Large-Scale Circulation . . . . .	430
23.3.2	Near-Surface Wind and Storminess . . . . .	431
23.3.3	Hydrological Cycle . . . . .	431
23.4	Causes of Change in the Baltic Sea . . . . .	434
23.5	Causes of Climate Change Impacts . . . . .	435
23.6	Conclusion. . . . .	436
	References. . . . .	436
<b>24</b>	<b>Causes of Regional Change—Aerosols</b> . . . . .	441
	Hans-Christen Hansson and Jonas Bhend	
24.1	Introduction . . . . .	441
24.2	The Basics About Aerosols and Climate . . . . .	441
24.2.1	Influence of Aerosols on Climate . . . . .	441
24.2.2	Atmospheric Particle Size Distribution . . . . .	443
24.2.3	Formation of Aerosols in the Atmosphere . . . . .	444
24.2.4	Aerosol–Cloud Interactions. . . . .	445
24.3	Aerosol Processes Affecting Climate . . . . .	445
24.3.1	Direct Effects . . . . .	445
24.3.2	Indirect Effects . . . . .	446
24.4	Aerosol Influence on Regional Climate . . . . .	447
24.4.1	Baltic Sea Area. . . . .	449
24.5	Climate Change Mitigation by Air Quality Mitigation . . . . .	449
24.6	Conclusion. . . . .	450
	References. . . . .	451
<b>25</b>	<b>Causes of Regional Change—Land Cover</b> . . . . .	453
	Marie-José Gaillard, Thomas Kleinen, Patrick Samuelsson, Anne Birgitte Nielsen, Johan Bergh, Jed Kaplan, Anneli Poska, Camilla Sandström, Gustav Strandberg, Anna-Kari Trondman, and Anna Wramneby
